```python
#all altitude in feet

alt_req= int(input("enter the valuue of a altitude--->  "))

if alt_req<1000:
    print("safe to land ,please land the plane correctly and safely")
elif  alt_req<1000 and alt_req>5000:
     print("bring down to 1000feet")
else:
     print("turn around")
```

```
    enter the valuue of a altitude--->  50
    safe to land ,please land the plane correctly and safely
```
